

Question Paper: Introduction to AI, ML & Deep Learning

Based on the passage about Artificial Intelligence, Machine Learning, and Deep Learning

Section A: Fill in the Blanks

1. Artificial Intelligence (AI) is the _____ of human intelligence by machines.
2. Machine Learning is a _____ of AI that allows systems to learn from data.
3. Deep Learning uses _____ with multiple layers.

Section B: Multiple Choice Questions

4. What does AI stand for?
 - a) Automated Intelligence
 - b) Artificial Intelligence
 - c) Advanced Interaction
 - d) Algorithmic Inference
5. Machine Learning is described as a:
 - a) Replacement for AI
 - b) Subset of AI
 - c) Type of hardware
 - d) Programming language
6. Deep Learning is based on:
 - a) Single-layer algorithms
 - b) Neural networks with multiple layers
 - c) Rule-based systems only
 - d) Manual data entry
7. Which of the following best describes the relationship between AI, ML, and Deep Learning?

- a) They are unrelated fields
- b) Deep Learning is a subset of Machine Learning, which is a subset of AI
- c) AI is a subset of Machine Learning
- d) Machine Learning is a subset of Deep Learning

Section C: True or False

- 8. Artificial Intelligence is the simulation of human intelligence by machines. (True / False)
- 9. Machine Learning does not require data to learn. (True / False)
- 10. Deep Learning uses neural networks with multiple layers. (True / False)

Section D: Short Answer Questions

- 11. Define Artificial Intelligence in your own words.
- 12. Explain how Machine Learning relates to Artificial Intelligence.
- 13. Describe what makes Deep Learning different from traditional Machine Learning approaches.
